

Aarhus, May 2012

## Welcome to **ONE WORLD, ONE LANGUAGE**

Insights Nordic heartily supports the Aarhus Academy for Global Education's work to provide minority language children with unique and globally oriented teaching styles that ensure the very best results in units of inquiry, trans-disciplinary learning and the use of backward design in internationally oriented curricula, and to guide these children on the road toward focused productivity and to their own sense of personal and professional ownership in the world.

Insights Nordic will continue to support the Aarhus Academy for Global Education by providing access to our learning solutions in order to strengthen the self awareness and communicative skills of the Academy's students and employees, helping them realise their full potential and let their true colours shine through.

We are fully convinced that the possibilities provided by the Academy in terms of educational opportunities for the families of international knowledge workers will prove to be a great benefit to the businesses in the Aarhus area, and contribute to the city's aim to become the European Capital of Culture, where culture, business and government work hand in hand to create an attractive city of the future.

We continue to be impressed by the passion and dedication driving this brilliant initiative, and hope to see the Aarhus Academy for Global Education grow, prosper and inspire others to start similar initiatives in the years to come.

With kind regards

  
Theresa Blegvad
